Most Dangerous Stocks: Monthly Updates

The Dangerous Stocks (+4.5%) rose more than the S&P 500 (+2.1%) and underperformed as a short portfolio last month. 18 stocks from our October Most Dangerous Large Cap and Small Cap lists outperformed the S&P 500 as shorts, and 12 stocks had negative returns. See Figure 2 for details. For updates on the performance of all of last month's Most Dangerous stocks, see Appendix A. We measure our October performance based on closing prices from October 06, 2010 to November 01, 2010. We published last month's report to subscribers on October 06, 2010 and to the general public on October 08, 2010.

Most Dangerous Stocks: Methodology

Stocks make our Most Dangerous list because they have:

1. **Poor-Quality Earnings** based on:
   a. Misleading earnings: rising and positive GAAP earnings while economic earnings are negative and falling; and
   b. Low Returns on Invested Capital (ROIC).

AND

2. **Expensive Valuations** based on:
   a. *Free-Cash Flow Yields*[1] that are very low or negative;
   b. *Price-to-Economic Book Value* (EBV) [2] ratios that are relatively high; and
   c. *Growth Appreciation Periods*[3] (GAP) that are relatively high.

Only stocks that earn an Overall Rating of Very Dangerous are allowed on our Most Dangerous Stocks lists.

The above characteristics also qualify stocks for a 'Very Dangerous' or 'Dangerous' Rating, according to our Risk/Reward Rating system. Figure 4 shows our Risk/Reward Rating analysis, which we apply to the 3000+ companies that we cover. Stocks get a grade of 1 to 5 for each criterion, 5 being the worst and 1 being the best score. The Overall score is based on the average score of all five criteria. Stocks must get an average score of 4.25 or above to be rated Very Dangerous. For the most part, only Very Dangerous stocks qualify for our Most Dangerous Stocks lists.

Figure 4: New Constructs Risk/Reward Rating for Stocks

Overall Risk/Reward Rating	Quality of Earnings		Valuation		
	Economic vs Reported EPS	Return on Invested Capital (ROIC)	FCF Yield	Price-to-EBV Ratio	Growth Appreciation Period (yrs)
Very Dangerous	Misleading Trend	Bottom Quintile	<-5%	> 3.5 or -1 > 0	> 50
Dangerous	False Positive	4th Quintile	-5%<-1%	2.4 > 3.5 or < -1	20 > 50
Neutral	Neutral EP	3rd Quintile	-1%<3%	1.6 > 2.4	10 > 20
Attractive	Positive EP	2nd Quintile	3%<10%	1.1 > 1.6	3 > 10
Very Attractive	Rising EP	Top Quintile	>10%	0 > 1.1	0 > 3

Sources: New Constructs, LLC

[1] Free-Cash Flow Yields measure the % of the total value of the firm for which the Free Cash Flows of the firm account. The formula is FCF/Current Enterprise Value.
[2] Economic Book Value (EBV) measures the no-growth value of the business based on its annual after-tax cash flow. The Formula for EBV is: (NOPAT / WACC) + Excess Cash + Non-operating assets – Debt (incl. Operating Leases) - Value of Outstanding Stock Options – Minority Interests.
[3] Growth Appreciation Period measures the number of years, implied by the market-price, that a company will grow its economic earnings. This measure assigns a numerical value to the width of the moat around a firm's business.

Explanation of Risk/Reward Rating System

Our Risk/Reward Rating System assigns a rating to every stock under our coverage according to what we believe are the 5 most important criteria for assessing the risk versus reward of stocks. See table that follows for details.

Overall Risk/Reward Ranking	**The Overall Risk/Reward Ranking provides a final rating based on the equal-weighted average rating of each criterion.**
Very Dangerous	FCF Yield is not included in the average.
Dangerous	FCF Yield is not included in the average.
Neutral	All criteria are equal-weighted in the average calculation.
Attractive	All criteria are equal-weighted in the average calculation.
Very Attractive	All criteria are equal-weighted in the average calculation.

Economic vs Reported EPS	**Rates stocks based on how their Economic Earnings compare to their Reported Earnings. Values based on Latest Fiscal Year.**
Very Dangerous	Negative and declining Economic Earnings despite positive and rising Reported Earnings
Dangerous	Same as above except Reported Earnings are not rising or Reported Earnings are not positive
Neutral	Negative Economic and Reported Earnings
Attractive	Economic Earnings are positive
Very Attractive	Economic Earnings are positive and rising

Return on Invested Capital (ROIC)	**Rates stocks based on their ROIC. Values based on Latest Fiscal Year.**
Bottom Quintile	Very Dangerous = the bottom 20% of Russell 1000 companies
4th Quintile	Dangerous = the bottom 40% of Russell 1000 companies
3rd Quintile	Neutral = the middle 20% of Russell 1000 companies
2nd Quintile	Attractive = the top 40% of Russell 1000 companies
Top Quintile	Very Attractive = the top 20% of Russell 1000 companies

FCF Yield	**Rates stocks based on their Free Cash Flow Yield. Values based on Latest Closing Stock price and Latest Fiscal Year.**
<-5%	Very Dangerous = less than or equal to -5%
-5%<-1%	Dangerous = more than -5% but less than or equal to -1%
-1%<3%	Neutral = more than -1% but less than or equal to +3%
3%<10%	Attractive = more than +3% but less than or equal to +10%
>10%	Very Attractive = more than +10%

Price-to-EBV Ratio	Rates stocks based on their Price-to-Economic Book Value Ratio. Values based on Latest Closing Stock price and Latest Fiscal Year.
>3.5 or -1>0	Very Dangerous = greater than or equal to 3.5 or less than 0 but greater than -1
2.4>3.5 or <-1	Dangerous = greater than or equal to 2.4 but less than 3.5 and less than or equal to -1
1.6>2.4	Neutral = greater than or equal to 1.6 but less than 2.4
1.1>1.6	Attractive = greater than or equal to 1.1 but less than 1.6
0>1.1	Very Attractive = greater than or equal to 0 but less than 1.1

Growth Appreciation Period (yrs)	Rates stocks based on their Market-Implied Growth Appreciation Period. Values based on Latest Closing Stock price and Default Forecast Scenario.
>50	Very Dangerous = greater than or equal to 50 years
20>50	Dangerous = at least 20 years but less than 50
10>20	Neutral = at least 10 years but less than 20
3>10	Attractive = at least 3 years but less than 10
0>3	Very Attractive = at least 0 years but less than 3

New Constructs® – Profile

New Constructs® is a specialty equity research firm. Our main activity is delivering to clients an integrated research platform that maximizes the analytical value of financial data. Our primary goal is to empower clients to achieve better investment performance.

Our main products are MaxVal™, MaxStrategy™ and MaxData™. These research tools are delivered via www.newconstructs.com. MaxVal is a DCF-based, equity valuation model that allows clients to define their own forecasts and forecast drivers. MaxStrategy is a stock screening/ranking tool that enables clients to analyze stocks based on many metrics, several unique to our platform. Both MaxVal & MaxStrategy are integrated with MaxData, our proprietary financial database. Unlike many other research firms, we do not buy our raw material - corporate financial data - from commercial vendors. Rather, we source it ourselves to create MaxData.

The key advantage provided by MaxData is that it delivers data drawn directly from SEC filings, including the *Notes to the Financial Statements*. We can cost-effectively deliver any reported data point. We believe our capabilities in this area are unmatched. For example, our MaxVal models provide both a high-integrity economic analysis as well as a traditional GAAP accounting analysis.

Our clients are professional investors, research firms, consulting firms and publicly listed corporations. We also partner with colleges and business schools. Our products may also be of interest to active individual investors.

For more information, visit our website: www.newconstructs.com.

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first 15 days after New Constructs issues a report on that security.

New Constructs is affiliated with Novo Capital Management, LLC, the general partner of a hedge fund. At any particular time, New Constructs' research recommendations may not coincide with the hedge fund's holdings. However, in no event will the hedge fund receive any research information or recommendations in advance of the information that New Constructs provides to its other clients.
