Investment Style Ratings For ETFs, Mutual Funds & Stocks

At the beginning of the third quarter of 2016, only the Large Cap Blend style earns an Attractive-or-better rating. Our style ratings are based on the aggregation of our fund ratings for every ETF and mutual fund in each style. See last quarter's Style Ratings here.

Investors looking for style funds that hold quality stocks should look no further than the Large Cap Blend and Large Cap Value styles. These styles house the most Attractive-or-better rated funds. Figures 4 through 7 provide more details. The primary driver behind an Attractive fund rating is good <u>portfolio management</u>, or good stock picking, with low <u>total annual costs</u>.

Attractive-or-better ratings do not always correlate with Attractive-or-better total annual costs. This fact underscores that (1) <u>cheap funds can dupe investors</u> and (2) investors should invest only in funds with good stocks and low fees.

See Figures 4 through 13 for a detailed breakdown of ratings distributions by investment style. See our <u>ETF & mutual fund screener</u> for rankings, ratings and reports on 6800+ mutual funds and 400+ ETFs. Our fund rating methodology is detailed <u>here</u>.

All of our reports on the best & worst ETFs and mutual funds in every investment style are available here.

Large Cap Blend	Attractive		

Source: New Constructs, LLC and company filings

To earn an Attractive-or-better Predictive Rating, an ETF or mutual fund must have high-quality holdings and low costs. Only the top 30% of all ETFs and mutual funds earn our Attractive or better rating.

Nuveen Concentrated Core Fund (NCARX) is the top rated Large Cap Blend fund. It gets our Very Attractive rating by allocating over 46% of its value to Attractive-or-better-rated stocks.

JPMorgan Chase & company (JPM: \$64/share) is one of our favorite stocks held by NCARX and earns an Attractive rating. Over the past decade, JPM has grown after-tax profit (NOPAT) by 10% compounded annually. The company has more than doubled its return on invested capital (ROIC) from 4% in 205 to 9% over the last twelve months. Additionally, the firm generates significant free cash flow, a cumulative \$51 billion over the last five years. Despite the underlying strength, JPM remains undervalued. At its current price of \$64/share, JPM has a price-to-economic book value (PEBV) ratio of 1.0. This ratio means that the market expects JPM's NOPAT to never meaningfully grow from its current level. If JPM can grow NOPAT by just 5% compounded annually for the next decade, the stock is worth \$88/share today – a 38% upside.

ProFunds Mid Cap Value ProFund (MLPSX) is the worst rated Small Cap Value fund. It gets our Very Dangerous rating by allocating over 44% of its value to Dangerous-or-worse-rated stocks. Making matters worse, it charges investors total annual costs of 6.72%.

Very

Dangerous

Dangerous

of Funds

New York Community Bancorp (NYCB: \$15/share) is one of our least favorite stocks held by MLPSX and earns a Dangerous rating. NYCB's <u>economic earnings</u> have declined from -\$21 million in 2005 to -\$499 million over the last twelve months. The company's ROIC has fallen from 8% in 2005 to a bottom-quintile -1% over the TTM, which is even lower than the ROIC earned in 2008. Given the deterioration of business operations, the expectations baked into NYCB are overly optimistic. To justify its current price of \$15/share, NYCB must immediately achieve 11% NOPAT margins (-11% TTM) and grow revenue by 24% compounded annually for the next 18 years. Few companies in the history of the world have been able to grow revenue by double digits for nearly two decades. Such high expectations already price into NYCB make it one to avoid.

This table shows that only the best of the best funds get our Very Attractive Rating: they must hold good stocks AND have low costs. Investors deserve to have the best of both and we are here to give it to them.

Ratings by Investment Style

Figure 4 presents a mapping of Very Attractive funds by investment style. The chart shows the number of Very Attractive funds in each investment style and the percentage of assets in each style allocated to funds that are rated Very Attractive.

Appendix: Predictive Fund Rating System

New Constructs' <u>Predictive fund Ratings</u> enable smarter investing by assessing the key drivers of future fund performance. We start by analyzing every funds' holdings based on New Constructs' stock ratings, which are regularly featured as among the <u>best by Barron's</u>. Next, we measure and rank the all-in fund expenses. Finally, we rank the fund compared to all other funds to identify the best and worst funds in the market.

Intuitively, there are two drivers for future fund performance.

- 1. Stock-picking (Portfolio Management Rating) and
- 2. Fund expenses (Total Annual Costs Rating)

Our Predictive Fund Rating is based on these drivers and the fund's ranking:

- 1. Top 10% = Very Attractive Rating
- 2. Next 20% = Attractive Rating
- 3. Next 40% = Neutral Rating
- 4. Next 20% = Dangerous Rating
- 5. Bottom 10% = Very Dangerous Rating

The figure below details the criteria that drive our Predictive Rating system for funds. The two drivers of our predictive ratings system are Portfolio Management and Total Annual Costs. The Portfolio Management ratings (detail here) is the same as our Stock Rating (detail <a href=here) except that we incorporate Asset Allocation (details <a href=here). The Total Annual Costs Ratings (details <a href=here) captures the all-in costs of being in a fund over a 3-year holding period, the average period for all mutual funds.

	Portfolio Management Rating						
Predictive	Business	Strength	Valuation			Total	
Rating	Quality of Earnings	Return on Invested Capital	FCF Yield	Price to Economic Book Value	Market- Implied Duration of Growth	Cash Allocation	Annual Costs
Very Dangerous	Misleading Trend	Bottom Quintile	< -5%	>3.5 or -1<0	> 50	> 20%	> 4 %
Dangerous	False Positive	4th Quintile	-5% < -1%	2.4<3.5 or <- 1	20 < 50	8% < 20%	2% < 4%
Neutral	Neutral EE	3rd Quintile	-1% < 3%	1.6 < 2.4	10 < 20	2.5% < 8%	1% < 2%
Attractive	Positive EE	2nd Quintile	3% < 10%	1.1 < 1.6	3 < 10	1% < 2.5%	0.5% < 1%
Very Attractive	Rising EE	Top Quintile	> 10%	0 < 1.1	0 < 3	<1%	< 0.5%

New Constructs® - Profile

How New Constructs Creates Value for Clients

We find it. You benefit. Cutting-edge technology enables us to scale our <u>forensic accounting</u> <u>expertise</u> across 3000+ stocks. We shine a light in the dark corners of SEC filings so our clients can make safer, more informed decisions.

Our <u>stock rating methodology</u> instantly informs you of the quality of the business and the fairness of the stock's valuation. We do the diligence on earnings quality and valuation so you don't have to.

In-depth risk/reward analysis underpins our ratings. Our rating methodology grades every stock, ETF, and mutual fund according to what we believe are the 5 most important criteria for assessing the quality of an equity. Each grade reflects the balance of potential risk and reward of buying that equity. Our analysis results in the 5 ratings described below. Very Attractive and Attractive correspond to a "Buy" rating, Very Dangerous and Dangerous correspond to a "Sell" rating, while Neutral corresponds to a "Hold" rating.

QUESTION: Why shouldn't fund research be as good as stock research? Why should fund investors rely on backward-looking price trends?

ANSWER: They should not.

Don't judge a fund by its cover. Take a look inside at its holdings and understand the quality of earnings and valuation of the stocks it holds. We enable you to choose the best fund based on its stock-picking merits so you do not have to rely solely on backward-looking technical metrics.

The drivers of our <u>forward-looking fund ratings</u> are Portfolio Management (i.e. the aggregated ratings of its holdings) and Total Annual Costs. The Total Annual Costs Rating (<u>details here</u>) captures the all-in cost of being in a fund over a 3-year holding period, the average period for all fund investors.

Our Philosophy About Research

Accounting data is not designed for equity investors, but for debt investors. Accounting data must be translated into economic earnings to understand the profitability and valuation relevant to equity investors. Respected investors (e.g. Adam Smith, Warren Buffett and Ben Graham) have repeatedly emphasized that accounting results should not be used to value stocks. Economic earnings are what matter because they are:

- 1. Based on the complete set of financial information available.
- 2. Standard for all companies.
- 3. A more accurate representation of the true underlying cash flows of the business.

Additional Information

Incorporated in July 2002, New Constructs is an independent publisher of investment research that provides clients with consulting and research services. We specialize in quality-of-earnings, forensic accounting and discounted cash flow valuation analyses for all U.S. public companies. We translate accounting data from 10Ks into economic financial statements, i.e. NOPAT, Invested Capital, and WACC, to create economic earnings models, which are necessary to understand the true profitability and valuation of companies. Visit the Free Archive to download samples of our research. New Constructs is a BBB accredited business and a member of the Investorside Research Association.

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first 15 days after New Constructs issues a report on that security.
