

# **How To Avoid the Worst Sector ETFs**

Question: Why are there so many ETFs?

Answer: ETF providers tend to make lots of money on each ETF so they create more products to sell.

The large number of ETFs has little to do with serving your best interests. Below are three red flags you can use to avoid the worst ETFs:

#### 1. Inadequate Liquidity

This issue is the easiest to avoid, and our advice is simple. Avoid all ETFs with less than \$100 million in assets. Low levels of liquidity can lead to a discrepancy between the price of the ETF and the underlying value of the securities it holds. Plus, low asset levels tend to mean lower volume in the ETF and larger bid-ask spreads.

#### 2. High Fees

ETFs should be cheap, but not all of them are. The first step here is to know what is cheap and expensive.

To ensure you are paying average or below average fees, invest only in ETFs with <u>total annual costs</u> below 0.48%, which is the average total annual costs out of the 178 U.S. equity Sector ETFs we cover. The weighted average is lower at 0.27%, which highlights how investors tend to put their <u>money in ETFs with low fees</u>.

Figure 1 shows PowerShares KBW High Dividend Yield Portfolio (KBWD) is the most expensive sector ETF and Schwab U.S. REIT ETF (SCHH) is the least expensive. No one provider provides more than one of the most expensive ETFs while Fidelity ETFs (FSTA, FTEC, FDIS, FHLC) are among the cheapest.

Figure 1: 5 Least and Most Expensive Sector ETFs

Ticker	Name	Sector	Total Annual Cost	
Most Expensive				
KBWD	PowerShares KBW High Dividend Yield Portfolio	Financials/Non-REIT	3.50%	
HECO	EcoLogical Strategy ETF	Industrials	1.06%	
UTES	Reaves Utilities ETF	Utilities	1.06%	
BBP	BioShares Biotechnology Products Fund	Health Care	0.95%	
FFTY	Academy Funds Innovator IBD 50 Fund	Financials/Non-REIT	0.89%	
Least Expensive				
SCHH	Schwab US REIT ETF	Financials/REIT	0.08%	
FSTA	Fidelity MSCI Consumer Staples Index ETF	Consumer Staples	0.09%	
FTEC	Fidelity MSCI Information Technology Index ETF	Information Technology	0.09%	
FDIS	Fidelity MSCI Consumer Discretionary Index ETF	Consumer Discretionary	0.09%	
FHLC	Fidelity MSCI Health Care Index ETF	Health Care	0.09%	

Sources: New Constructs, LLC and company filings

Investors need not pay high fees for quality holdings. Vanguard Consumer Staples Index Fund (VDC) earns our Very Attractive rating and has low total annual costs of only 0.11%.

On the other hand, Fidelity MSCI Utilities Index (FUTY) holds poor stocks and receives our Dangerous rating, yet has low total annual costs of 0.09%. No matter how cheap an ETF, if it holds bad stocks, its performance will be bad. The quality of an ETFs holdings matters more than its price.

#### 3. Poor Holdings

Avoiding poor holdings is by far the hardest part of avoiding bad ETFs, but it is also the most important because an ETF's performance is determined more by its holdings than its costs. Figure 2 shows the ETFs within each sector with the worst holdings or <u>portfolio management ratings</u>.

Figure 2: Sector ETFs with the Worst Holdings

Ticker	Name	Sector	Portfolio Management Rating
VCR	Vanguard Consumer Discretionary Index Fund	Consumer Discretionary	Neutral
PSCC	PowerShares S&P SmallCap Consumer Staples	Consumer Staples	Neutral
FENY	Fidelity MSCI Energy Index ETF	Energy	Dangerous
FTY	iShares Real Estate 50 ETF	Financials	Dangerous
XBI	State Street SPDR S&P Biotech ETF	Health Care	Dangerous
EVX	Van Eck Vectors Environmental Services	Industrials	Dangerous
ARKK	ARK Innovation ETF	Information Technology	Dangerous
XME	State Street SPDR S&P Metals & Mining ETF	Materials	Dangerous
IYZ	iShares US Telecommunications ETF	Telecom Services	Dangerous
PSCU	PowerShares S&P SmallCap Utilities	Utilities	Dangerous

Sources: New Constructs, LLC and company filings

PowerShares (PSCC and PSCU), iShares (FTY and IYZ), and State Street (XBI and XME) appear more often than any other providers in Figure 2, which means they offer the most ETFs with the worst holdings.

ARK Innovation ETF (ARKK) is the worst rated ETF in Figure 2. iShares U.S. Telecommunications (IYZ) and State Street SPDR S&P Biotech ETF (XBI) also earn a Very Dangerous <u>predictive overall rating</u>, which means not only do they hold poor stocks, they charge high total annual costs.

Our overall ratings on ETFs are based primarily on our stock ratings of their holdings.

#### The Danger Within

Buying an ETF without analyzing its holdings is like buying a stock without analyzing its business and finances. Put another way, research on ETF holdings is necessary due diligence because an ETF's performance is only as good as its holdings' performance. Don't just take our word for it, see what Barron's says on this matter.

#### PERFORMANCE OF ETFs HOLDINGs = PERFORMANCE OF ETF

### New Constructs® - Profile

#### How New Constructs Creates Value for Clients

We find it. You benefit. Cutting-edge technology enables us to scale our <u>forensic accounting</u> <u>expertise</u> across 3000+ stocks. We shine a light in the dark corners of SEC filings so our clients can make safer, more informed decisions.

Our <u>stock rating methodology</u> instantly informs you of the quality of the business and the fairness of the stock's valuation. We do the diligence on earnings quality and valuation so you don't have to.

In-depth risk/reward analysis underpins our ratings. Our rating methodology grades every stock, ETF, and mutual fund according to what we believe are the 5 most important criteria for assessing the quality of an equity. Each grade reflects the balance of potential risk and reward of buying that equity. Our analysis results in the 5 ratings described below. Very Attractive and Attractive correspond to a "Buy" rating, Very Dangerous and Dangerous correspond to a "Sell" rating, while Neutral corresponds to a "Hold" rating.

QUESTION: Why shouldn't fund research be as good as stock research? Why should fund investors rely on backward-looking price trends?

ANSWER: They should not.

Don't judge a fund by its cover. Take a look inside at its holdings and understand the quality of earnings and valuation of the stocks it holds. We enable you to choose the best fund based on its stock-picking merits so you do not have to rely solely on backward-looking technical metrics.

The drivers of our <u>forward-looking fund ratings</u> are Portfolio Management (i.e. the aggregated ratings of its holdings) and Total Annual Costs. The Total Annual Costs Rating (<u>details here</u>) captures the all-in cost of being in a fund over a 3-year holding period, the average period for all fund investors.

### Our Philosophy About Research

Accounting data is not designed for equity investors, but for debt investors. Accounting data must be translated into economic earnings to understand the profitability and valuation relevant to equity investors. Respected investors (e.g. Adam Smith, Warren Buffett and Ben Graham) have repeatedly emphasized that accounting results should not be used to value stocks. Economic earnings are what matter because they are:

- 1. Based on the complete set of financial information available.
- 2. Standard for all companies.
- 3. A more accurate representation of the true underlying cash flows of the business.

#### Additional Information

Incorporated in July 2002, New Constructs is an independent publisher of investment research that provides clients with consulting and research services. We specialize in quality-of-earnings, forensic accounting and discounted cash flow valuation analyses for all U.S. public companies. We translate accounting data from 10Ks into economic financial statements, i.e. NOPAT, Invested Capital, and WACC, to create economic earnings models, which are necessary to understand the true profitability and valuation of companies. Visit the Free Archive to download samples of our research. New Constructs is a BBB accredited business and a member of the Investorside Research Association.
