

ETF & Mutual Fund Rankings: Information Technology Sector

The Information Technology sector ranks third out of the ten sectors as detailed in our [1Q17 Sector Ratings for ETFs and Mutual Funds](#) report. [Last quarter](#), the Information Technology sector ranked third. It gets our Neutral rating, which is based on an aggregation of ratings of 28 ETFs and 108 mutual funds in the Information Technology sector as of January 19, 2017. See a recap of our [4Q16 Sector Ratings here](#).

Figures 1 and 2 show the five best and worst rated ETFs and mutual funds in the sector. Not all Information Technology sector ETFs and mutual funds are created the same. The number of holdings varies widely (from 25 to 374). This variation creates drastically different investment implications and, therefore, ratings.

Investors seeking exposure to the Information Technology sector should buy one of the Attractive-or-better rated ETFs or mutual funds from Figures 1 and 2.

Here is our [ETF and mutual fund rating methodology](#), which leverages our rigorous analysis of each fund's holdings. We think advisors and investors focused on prudent investment decisions should include analysis of fund holdings in their research process for ETFs and mutual funds.

Figure 1: ETFs with the Best & Worst Ratings – Top 5

	Allocation of ETF Holdings			
Ticker	Attractive-or-better Stocks	Neutral Stocks	Dangerous-or-worse Stocks	Predictive Rating
Best ETFs				
IYW	32%	47%	14%	Very Attractive
RYT	32%	43%	25%	Very Attractive
VGT	26%	51%	15%	Very Attractive
FTEC	26%	51%	15%	Very Attractive
IXN	23%	44%	8%	Very Attractive
Worst ETFs				
ARKW	0%	19%	56%	Dangerous
PSCT	9%	40%	46%	Dangerous
FDN	14%	29%	46%	Dangerous
IGV	16%	43%	38%	Dangerous
ARKK	1%	13%	59%	Very Dangerous

* Best ETFs exclude ETFs with TNAs less than \$100 million for inadequate liquidity.

Figure 2: Mutual Funds with the Best & Worst Ratings – Top 5

	Allocation of Mutual Fund Holdings			
Ticker	Attractive-or-better Stocks	Neutral Stocks	Dangerous-or-worse Stocks	Predictive Rating
Best Mutual Funds				
FDCPX	17%	45%	21%	Very Attractive
VITAX	26%	51%	15%	Attractive
ROGSX	34%	32%	25%	Attractive
FSDCX	37%	36%	16%	Attractive
SGTRX	30%	23%	40%	Neutral
Worst Mutual Funds				
IFOBX	13%	32%	46%	Very Dangerous
USTBX	12%	27%	40%	Very Dangerous
JATAX	14%	29%	31%	Very Dangerous
WSTBX	12%	28%	41%	Very Dangerous
RIFYX	7%	17%	46%	Very Dangerous

* Best mutual funds exclude funds with TNAs less than \$100 million for inadequate liquidity.

Sources: New Constructs, LLC and company filings

Six mutual funds are excluded from Figure 2 because their total net assets (TNA) are below \$100 million and do not meet our liquidity minimums. See our [mutual fund screener](#) for more details.

iShares US Technology ETF (IYW) is the top-rated Information Technology ETF and Fidelity Computers Portfolio (FDCPX) is the top-rated Information Technology mutual fund. Both earn a Very Attractive rating.

ARK Innovation ETF (ARKK) is the worst rated Information Technology ETF and Victory RS Science and Technology Fund (RIFYX) is the worst rated Information Technology mutual fund. Both earn a Very Dangerous rating.

476 stocks of the 3000+ we cover are classified as Information Technology stocks.

The Danger Within

Buying a fund without analyzing its holdings is like buying a stock without analyzing its business and finances. Put another way, research on fund holdings is necessary due diligence because a fund's performance is only as good as its holdings' performance. Don't just take our word for it, [see what Barron's says](#) on this matter.

PERFORMANCE OF HOLDINGS = PERFORMANCE OF FUND

Figures 3 and 4 show the rating landscape of all Information Technology ETFs and mutual funds.

New Constructs® – Profile

How New Constructs Creates Value for Clients

We find it. You benefit. Cutting-edge technology enables us to scale our [forensic accounting expertise](#) across 3000+ stocks. We shine a light in the dark corners of SEC filings so our clients can make safer, more informed decisions.

Our [stock rating methodology](#) instantly informs you of the quality of the business and the fairness of the stock's valuation. We do the diligence on earnings quality and valuation so you don't have to.

In-depth risk/reward analysis underpins our ratings. Our rating methodology grades every stock, ETF, and mutual fund according to what we believe are the 5 most important criteria for assessing the quality of an equity. Each grade reflects the balance of potential risk and reward of buying that equity. Our analysis results in the 5 ratings described below. Very Attractive and Attractive correspond to a "Buy" rating, Very Dangerous and Dangerous correspond to a "Sell" rating, while Neutral corresponds to a "Hold" rating.

QUESTION: Why shouldn't fund research be as good as stock research? Why should fund investors rely on backward-looking price trends?

ANSWER: They should not.

Don't judge a fund by its cover. Take a look inside at its holdings and understand the quality of earnings and valuation of the stocks it holds. We enable you to choose the best fund based on its stock-picking merits so you do not have to rely solely on backward-looking technical metrics.

The drivers of our [forward-looking fund ratings](#) are Portfolio Management (i.e. the aggregated ratings of its holdings) and Total Annual Costs. The Total Annual Costs Rating ([details here](#)) captures the all-in cost of being in a fund over a 3-year holding period, the average period for all fund investors.

Our Philosophy About Research

Accounting data is not designed for equity investors, but for debt investors. [Accounting data must be translated into economic earnings](#) to understand the profitability and valuation relevant to equity investors. Respected investors (e.g. Adam Smith, Warren Buffett and Ben Graham) have repeatedly emphasized that accounting results should not be used to value stocks. [Economic earnings](#) are what matter because they are:

1. Based on the complete set of financial information available.
2. Standard for all companies.
3. A more accurate representation of the true underlying cash flows of the business.

Additional Information

Incorporated in July 2002, [New Constructs](#) is an independent publisher of investment research that provides clients with consulting and research services. We specialize in quality-of-earnings, forensic accounting and discounted cash flow valuation analyses for all U.S. public companies. We translate accounting data from 10Ks into economic financial statements, i.e. [NOPAT](#), [Invested Capital](#), and [WACC](#), to create [economic earnings models](#), which are necessary to understand the true profitability and valuation of companies. Visit the [Free Archive](#) to download samples of our research. New Constructs is a [BBB accredited](#) business and a member of the [Investorside Research Association](#).

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first 15 days after New Constructs issues a report on that security.
