ETF & Mutual Fund Rankings: Mid Cap Value Style

The Mid Cap Value style ranks tenth out of the twelve fund styles as detailed in our 1Q17 Style Ratings for ETFs and Mutual Funds report. Last quarter, the Mid Cap Value style ranked ninth. It gets our Dangerous rating, which is based on an aggregation of ratings of 8 ETFs and 126 mutual funds in the Mid Cap Value style as of January 31, 2017. See a recap of our 4Q16 Style Ratings here.

Figure 1 ranks from best to worst the seven Mid-Cap Value ETFs that meet our liquidity standards and Figure 2 shows the five best and worst rated Mid-Cap Value mutual funds. Not all Mid Cap Value style ETFs and mutual funds are created the same. The number of holdings varies widely (from 21 to 673). This variation creates drastically different investment implications and, therefore, ratings.

Investors seeking exposure to the Mid Cap Value style should buy one of the Attractive-or-better rated ETFs or mutual funds from Figures 1 and 2.

Here is our <u>ETF and mutual fund rating methodology</u>, which leverages our rigorous analysis of each fund's holdings. We think advisors and investors focused on prudent investment decisions should include analysis of fund holdings in their research process for ETFs and mutual funds.

James Mid Cap Fund (JAMDX) is excluded from Figure 2 because its total net assets (TNA) are below \$100 million and do not meet our liquidity minimums.

Direxion All Cap Insider Sentiment Shares (KNOW) is the top-rated Mid Cap Value ETF and Reinhart Mid Cap PMV Fund (RPMMX) is the top-rated Mid Cap Value mutual fund. Both earn an Attractive rating.

Vanguard Mid-Cap Value Index Fund (VOE) is the worst rated Mid Cap Value ETF and Intrepid Disciplined Value Fund (ICMCX) is the worst rated Mid Cap Value mutual fund. VOE earns a Neutral rating and ICMCX earns a Very Dangerous rating.

The Danger Within

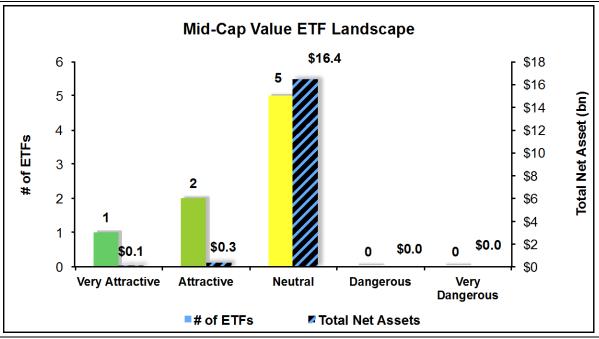

Buying a fund without analyzing its holdings is like buying a stock without analyzing its business and finances. Put another way, research on fund holdings is necessary due diligence because a fund's performance is only as good as its holdings' performance. Don't just take our word for it, see what Barron's says on this matter.

PERFORMANCE OF HOLDINGS = PERFORMANCE OF FUND

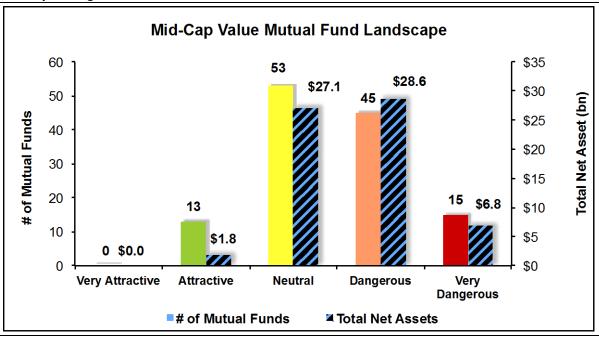

Figures 3 and 4 show the rating landscape of all Mid Cap Value ETFs and mutual funds.

New Constructs® - Profile

How New Constructs Creates Value for Clients

We find it. You benefit. Cutting-edge technology enables us to scale our forensic accounting expertise across 3000+ stocks. We shine a light in the dark corners of SEC filings so our clients can make safer, more informed decisions.

Our stock rating methodology instantly informs you of the quality of the business and the fairness of the stock's valuation. We do the diligence on earnings quality and valuation so you don't have to.

In-depth risk/reward analysis underpins our ratings. Our rating methodology grades every stock, ETF, and mutual fund according to what we believe are the 5 most important criteria for assessing the quality of an equity. Each grade reflects the balance of potential risk and reward of buying that equity. Our analysis results in the 5 ratings described below. Very Attractive and Attractive correspond to a "Buy" rating, Very Dangerous and Dangerous correspond to a "Sell" rating, while Neutral corresponds to a "Hold" rating.

QUESTION: Why shouldn't fund research be as good as stock research? Why should fund investors rely on backward-looking price trends?

ANSWER: They should not.

Don't judge a fund by its cover. Take a look inside at its holdings and understand the quality of earnings and valuation of the stocks it holds. We enable you to choose the best fund based on its stock-picking merits so you do not have to rely solely on backward-looking technical metrics.

The drivers of our forward-looking fund ratings are Portfolio Management (i.e. the aggregated ratings of its holdings) and Total Annual Costs. The Total Annual Costs Rating (details here) captures the all-in cost of being in a fund over a 3-year holding period, the average period for all fund investors.

Our Philosophy About Research

Accounting data is not designed for equity investors, but for debt investors. Accounting data must be translated into economic earnings to understand the profitability and valuation relevant to equity investors. Respected investors (e.g. Adam Smith, Warren Buffett and Ben Graham) have repeatedly emphasized that accounting results should not be used to value stocks. Economic earnings are what matter because they are:

- 1. Based on the complete set of financial information available.
- 2. Standard for all companies.
- 3. A more accurate representation of the true underlying cash flows of the business.

Additional Information

Incorporated in July 2002, New Constructs is an independent publisher of investment research that provides clients with consulting and research services. We specialize in quality-of-earnings, forensic accounting and discounted cash flow valuation analyses for all U.S. public companies. We translate accounting data from 10Ks into economic financial statements, i.e. NOPAT, Invested Capital, and WACC, to create economic earnings models, which are necessary to understand the true profitability and valuation of companies.
