Featured Stock in November's Dividend Growth Model Portfolio

Eleven new stocks make our Dividend Growth Stocks Model Portfolio this month, which was made available to members on November 24, 2020.

Recap From October's Picks

On a price return basis, our Dividend Growth Stocks Model Portfolio (+7.3%) underperformed the S&P 500 (+7.7%) by 0.4% from October 29, 2020 through November 20, 2020. On a total return basis, the Model Portfolio (+7.5%) underperformed the S&P 500 (+7.7%) by 0.2% over the same time. The best performing stock was up 29%. Overall, 14 out of the 30 Dividend Growth Stocks outperformed the S&P 500 from October 29, 2020 through November 20, 2020.

Only our research utilizes the superior data and earnings adjustments featured by the HBS & MIT Sloan paper, "Core Earnings: New Data and Evidence" (accepted for publication in The Journal of Financial Economics). The long-term success of our model portfolio strategies highlights the value of our Robo-Analyst technology[1], which scales our forensic accounting expertise (featured in Barron's) across thousands of stocks[2].

The methodology for this model portfolio mimics an All-Cap Blend style with a focus on dividend growth. Selected stocks earn an Attractive or Very Attractive rating, generate positive free cash flow (FCF) and economic earnings, offer a current dividend yield >1%, and have a 5+ year track record of consecutive dividend growth. This model portfolio is designed for investors who are more focused on long-term capital appreciation than current income, but still appreciate the power of dividends, especially growing dividends.

Featured Stock From November: Amdocs, Ltd. (DOX: $66/share)

Amdocs, Ltd. (DOX) is the featured stock from November's Dividend Growth Stocks Model Portfolio.

Amdocs has grown revenue and net operating profit after-tax (NOPAT) by 10% compounded annually over the past 20 years. Since 2009, Amdocs has grown NOPAT by 4% compounded annually. While the firm's return on invested capital (ROIC) has slightly decreased from 10.5% in 2009 to 10.4% TTM, its economic earnings, or the true cash flows of the business, have grown from $155 million to $280 million over the same time.

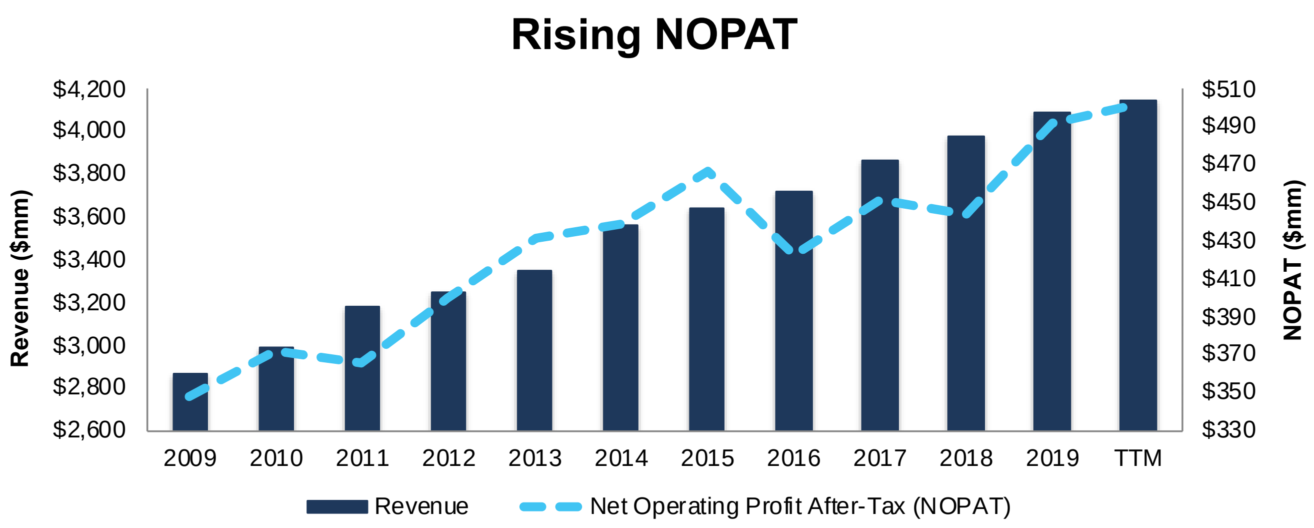
Figure 1: Amdocs' Revenue & NOPAT Since 2009



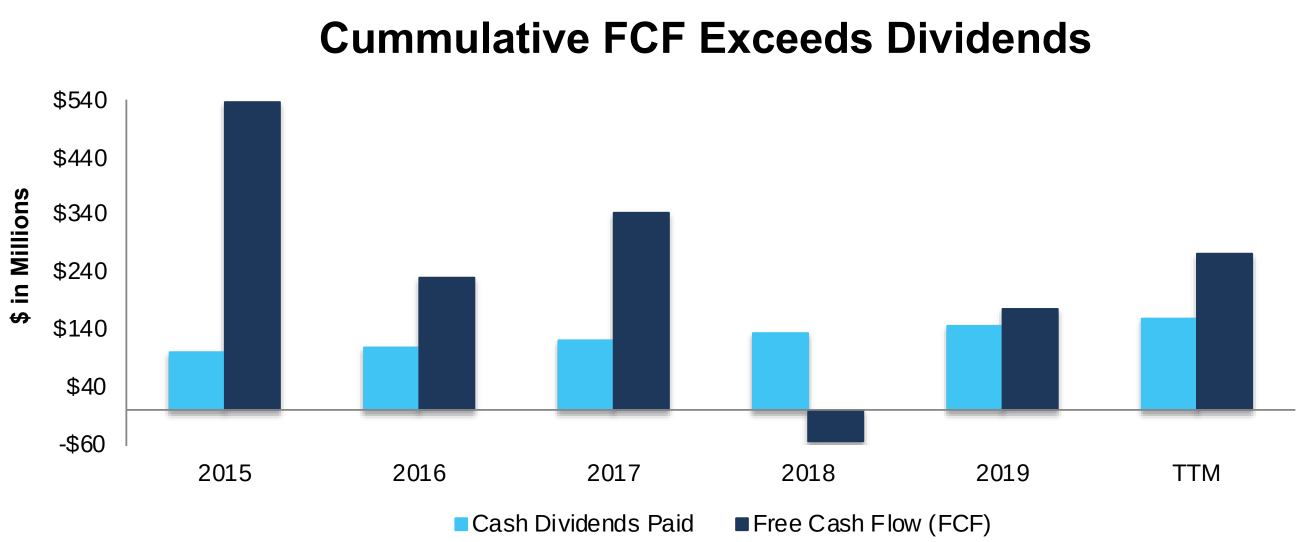
Sources: New Constructs, LLC and company filings

Steady Dividend Growth Supported by FCF

Amdocs has grown its dividend by 14% compounded annually over the past four years from $0.67 in 2015 to $1.11 in 2019. The current quarterly dividend, when annualized, equals $1.31/share and provides a 2.0% dividend yield.

More importantly, Amdocs' strong free cash flow (FCF) supports the firm's dividend payment. Amdocs generated $1.2 billion (14% of current market cap) in FCF while paying $614 million in dividends from 2015 to 2019, per Figure 2. Over the trailing twelve months, Amdocs generated $273 million in free cash flow and paid $159 million in dividends.

Figure 2: Free Cash Flow (FCF) vs. Regular Dividend Payments



Sources: New Constructs, LLC and company filings

Companies with FCF well in excess of dividend payments provide higher quality dividend growth opportunities because we know the firm generates the cash to support a higher dividend. On the other hand, the dividend of a company where FCF falls short of the dividend payment over time cannot be trusted to grow or even maintain its dividend because of inadequate free cash flow.

DOX Has Upside Potential

At its current price of $66/share DOX has a price-to-economic book value (PEBV) ratio of 0.7. This ratio means the market expects Amdocs' NOPAT to permanently decline by 30%. This expectation seems overly pessimistic for a firm that has grown NOPAT by 10% compounded annually over the past two decades.

If Amdocs can maintain its TTM NOPAT margin of 12% and grow NOPAT by just 5% compounded annually for the next 10 years, the stock is worth $124/share today – an 88% upside. See the math behind this reverse DCF scenario. Add in Amdocs' 2.0% dividend yield and history of dividend growth, and it's clear why this stock is in November's Dividend Growth Stocks Model Portfolio.

Critical Details Found in Financial Filings by Our Robo-Analyst Technology

As investors focus more on fundamental research, research automation technology is needed to analyze all the critical financial details in financial filings as shown in the Harvard Business School and MIT Sloan paper, "Core Earnings: New Data and Evidence".

Below are specifics on the adjustments we make based on Robo-Analyst findings in Amdocs' 2019 20-F:

Income Statement: we made $40 million of adjustments with a net effect of removing $15 million in non-operating expenses (<1% of revenue). See all adjustments made to Amdocs' income statement here.

Balance Sheet: we made $1.4 billion of adjustments to calculate invested capital with a net increase of $606 million. The most notable adjustment was $501 million (12% of reported net assets) related to goodwill. See all adjustments to Amdocs' balance sheet here.

Valuation: we made $2.1 billion of adjustments with a net effect of decreasing shareholder value by $174 million. Apart from total debt, one of the most notable adjustments to shareholder value was $987 million in excess cash. This adjustment represents 11% of Amdocs' market value. See all adjustments to Amdocs' valuation here.

Footnotes adjustments matter. We are the ONLY source.

We provide ratings, models, reports & screeners on U.S. 3,000 stocks, 700 ETFs and 7,000 mutual funds.

HBS & MIT Sloan research reveals that:

- **Markets are inefficiently assessing earnings because no one reads the footnotes.**
- **Corporate managers hide gains/losses in footnotes to manage earnings.**
- **Our technology brings the material footnotes data to market for the first time ever.**

Combining human expertise with NLP/ML/AI technologies (featured by Harvard Business School), we shine a light in the dark corners (e.g. footnotes) of hundreds of thousands of financial filings to unearth critical details.

The HBS & MIT Sloan paper, Core Earnings: New Data and Evidence, shows how our superior data drives uniquely comprehensive and independent debt and equity research.

This paper compares our analytics on a mega cap company to other major providers. The Appendix details exactly how we stack up.

Quotes from HBS & MIT Sloan professors on our research:

Get better research:

"…the NC dataset provides a novel opportunity to study the properties of non-operating items disclosed in 10-Ks, and to examine the extent to which the market impounds their implications." – page 20

Pick better stocks:

"Trading strategies that exploit cross-sectional differences in firms' transitory earnings produce abnormal returns of 7-to-10% per year." – Abstract

Avoid losses from using other firms' data:

"…many of the income-statement-relevant quantitative disclosures collected by NC do not appear to be easily identifiable in Compustat…" – page 14

Build better models:

"Core Earnings [calculated using New Constructs' novel dataset] provides predictive power for various measures of one-year-ahead performance…that is incremental to their current-period counterparts." – page 4

Exploit market inefficiencies:

"These results … suggest that the adjustments made by analysts and Compustat to better capture core earnings are incomplete. Moreover, the non-core items identified by NC produce a measure of core earnings that is incremental to alternative measures of operating performance in predicting an array of future income measures." – page 26

Fulfill fiduciary duties:

"An appropriate measure of accounting performance for purposes of forecasting future performance requires detailed analysis of all quantitative performance disclosures detailed in the annual report, including those reported only in the footnotes and in the MD&A." – page 33-34

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first 15 days after New Constructs issues a report on that security.
