

Featured Stock in April's Safest Dividend Yields Model Portfolio

Five new stocks make our [Safest Dividend Yields Model Portfolio](#) this month, which was made available to members on April 22, 2021.

Recap from March's Picks

On a price return basis, our Safest Dividend Yields Model Portfolio (+2.0%) underperformed the S&P 500 (+5.8%) by 3.8% from March 19, 2021 through April 20, 2021. On a total return basis, the Model Portfolio (+2.3%) underperformed the S&P 500 (+5.8%) by 3.5% over the same time. The best performing large cap stock was up 10% and the best performing small cap stock was up 50%. Overall, 7 out of the 18 Safest Dividend Yield stocks outperformed their respective benchmarks (S&P 500 and Russell 2000) from March 19, 2021 through April 20, 2021.

[Learn more about the best fundamental research](#)

More reliable & [proprietary](#) fundamental data, proven in [The Journal of Financial Economics](#), drives our research. Our proprietary [Robo-Analyst technology](#)¹ scales our forensic accounting expertise ([featured in Barron's](#)) across thousands of stocks² to produce an unrivaled database of fundamental data.

This Model Portfolio only includes stocks that earn an [Attractive or Very Attractive](#) rating, have positive free cash flow and [economic earnings](#), and offer a dividend yield greater than 3%. Companies with strong [free cash flow](#) provide higher quality and safer dividend yields because we know they have the cash to support the dividend. We think this portfolio provides a uniquely well-screened group of stocks that can help clients outperform.

Featured Stock for April: Flowers Foods Inc. (FLO: \$24/share)

Flowers Foods Inc. (FLO) is the featured stock in April's Safest Dividend Yields Model Portfolio.

Flowers Foods has grown revenue by 5% compounded annually and net operating profit after tax ([NOPAT](#)) by 18% compounded annually over the past two decades. Flowers Food's NOPAT margin increased from 5% in 2016 to 7% in 2020 while its return on invested capital ([ROIC](#)) improved from 7% to 9% over the same time.

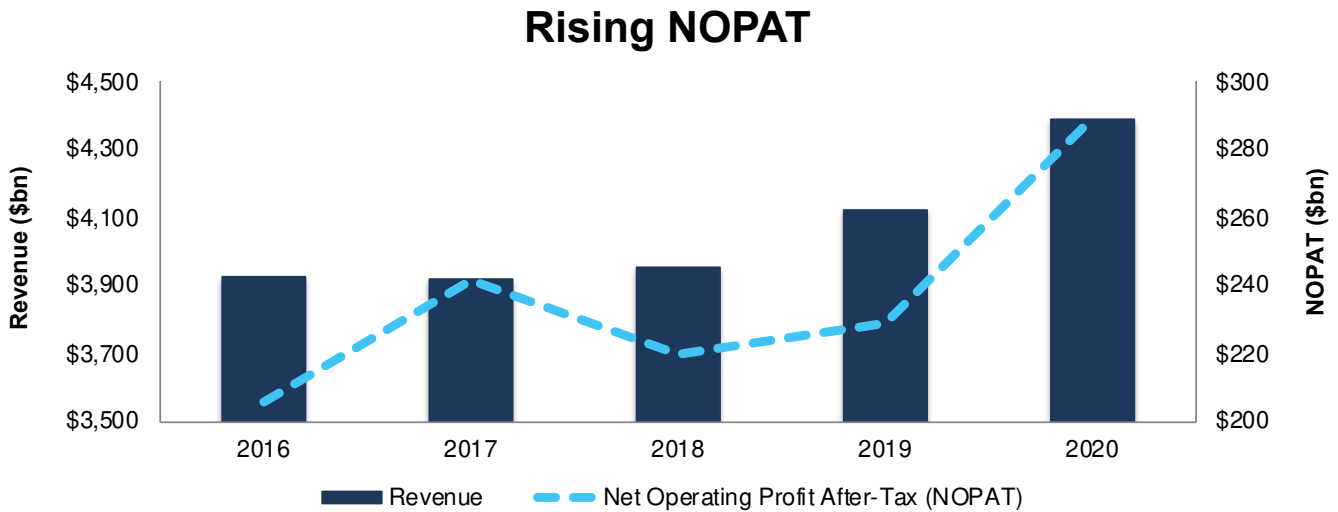

The firm's [economic earnings](#), or the true cash flows of the business, more than doubled from \$101 million in 2016 to \$204 million in 2020.

Sources: New Constructs, LLC and company filings

Cash Flow Supports Dividend Payments

Flowers Foods has increased its dividend for 18 consecutive years. More recently, the firm increased its dividend payment from \$0.57/share in 2015 to \$0.79/share in 2020, or 7% compounded annually. The current quarterly dividend, when annualized provides a 3.3% dividend yield.

Since 2015, Flowers Foods' cumulative FCF easily covers its annual dividend payments. Over the past six years, Flowers Foods generated \$1 billion (20% of current market cap) in FCF while paying \$870 million in dividends, per Figure 2.

Figure 2: Flowers Foods' FCF vs. Dividends Since 2015

Sources: New Constructs, LLC and company filings

Companies with strong FCF provide higher quality dividend yields because we know the firm has the cash to support its dividend. On the other hand, dividends from companies with low or negative FCF cannot be trusted as much because the company may not be able to sustain paying dividends.

**FLO Is Undervalued**

At its current price of \$24/share, FLO has a price-to-economic book value ([PEBV](#)) ratio of 0.5. This ratio means the market expects Flowers Foods' NOPAT to permanently decline by 50%. This expectation seems overly pessimistic given that Flowers Foods has grown NOPAT by 7% compounded annually over the past five years and 18% compounded annually over the past two decades.

Even if Flowers Foods' NOPAT margin falls to 5% (twenty-year average, vs. 7% in 2020) and the firm grows revenue by just 2% compounded annually over the next decade, the stock is worth \$39/share today – a 63% upside. In this scenario, Flowers Foods' NOPAT falls by 1% compounded annually over the next ten years. [See the math behind this reverse DCF scenario.](#)

Critical Details Found in Financial Filings by Our [Robo-Analyst Technology](#)

Fact: we provide [superior fundamental data](#) and earnings models – unrivaled in the world.

Proof: [Core Earnings: New Data & Evidence](#), forthcoming in The Journal of Financial Economics.

Below are specifics on the adjustments we make based on Robo-Analyst findings in Flowers Foods' 10-K:

Income Statement: we made \$277 million in adjustments with a net effect of removing \$137 million in [non-operating expenses](#) (3% of revenue). See all adjustments made to Flowers Foods' income statement [here](#).

Balance Sheet: we made \$338 million in adjustments to calculate invested capital with a net increase of \$124 million. The most notable adjustment was \$182 million (6% of reported net assets) in [asset write-downs](#). See all adjustments to Flowers Foods' balance sheet [here](#).

Valuation: we made \$1.6 billion of adjustments with a net effect of decreasing shareholder value by \$1.4 billion. Apart from [total debt](#), one of the most notable adjustments to shareholder value was \$128 million in net [deferred tax liabilities](#). This adjustment represents 3% of Flowers Foods' market value. See all adjustments to Flower Foods' valuation [here](#).

It's Official: We Offer the Best Fundamental Data in the World

Many firms claim their research is superior, but none of them can prove it with independent studies from highly-respected institutions as we can. Three different papers from both the public and private sectors show:

1. Legacy fundamental datasets suffer from significant inaccuracies, omissions and biases.
2. Only our “novel database” enables investors to overcome these flaws and apply [reliable](#) fundamental data in their research.
3. Our proprietary measures of [Core Earnings](#) and [Earnings Distortion](#) materially improve stock picking and forecasting of profits.

Best Fundamental Data in the World

Forthcoming in [The Journal of Financial Economics](#), a top peer-reviewed journal, [Core Earnings: New Data & Evidence](#) proves our Robo-Analyst technology overcomes material shortcomings in legacy firms' data collection processes to provide superior [fundamental data](#), [earnings](#) models, and [research](#). More [details](#).

Key quotes from the paper:

- “[New Constructs’] *Total Adjustments* differs significantly from the items identified and excluded from Compustat’s adjusted earnings measures. For example... 50% to 70% of the variation in *Total Adjustments* is not explained by S&P Global’s (*SPGI*) *Adjustments* individually.” – pp. 14, 1st para.
- “A final source of differences [between New Constructs’ and S&P Global’s data] is due to data collection oversights...we identified cases where Compustat did not collect information relating to firms’ income that is useful in assessing core earnings.” – pp. 16, 2nd para.

Superior Models

A top accounting firm features the superiority of our ROIC, NOPAT and Invested Capital research to Capital IQ & Bloomberg’s in [Getting ROIC Right](#). See the [Appendix](#) for direct comparison details.

Key quotes from the paper:

- “...an accurate calculation of ROIC requires more diligence than often occurs in some of the common, off-the-shelf ROIC calculations. Only by scouring the footnotes and the MD&A [as New Constructs does] can investors get an accurate calculation of ROIC.” – pp. 8, 5th para.
- “The majority of the difference...comes from New Constructs’ machine learning approach, which leverages technology to calculate ROIC by applying accounting adjustments that may be buried deeply in the footnotes across thousands of companies.” – pp. 4, 2nd para.

Superior Stock Ratings

Robo-Analysts’ stock ratings outperform those from human analysts as shown in this [paper](#) from Indiana’s Kelley School of Business. Bloomberg features the paper [here](#).

Key quotes from the paper:

- “the portfolios formed following the buy recommendations of Robo-Analysts earn abnormal returns that are statistically and economically significant.” – pp. 6, 3rd para.
- “Our results ultimately suggest that Robo-Analysts are a valuable, alternative information intermediary to traditional sell-side analysts.” – pp. 20, 3rd para.

Our mission is to provide the best fundamental analysis of public and private businesses in the world and make it affordable for all investors, not just Wall Street insiders.

We believe every investor deserves to know the whole truth about the profitability and valuation of any company they consider for investment. More details on our cutting-edge technology and how we use it are [here](#).

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first two days after New Constructs issues a report on that security.
