

How to Find the Best Style ETFs

Finding the best ETFs is an increasingly difficult task in a world with so many to choose from. How can you pick with so many choices available?

[Learn more about the best fundamental research](#)

Don't Trust ETF Labels

There are at least 147 different All Cap Blend ETFs and at least 573 ETFs across twelve styles. Do investors need 47+ choices on average per style? How different can the ETFs be?

Those 147 All Cap Blend ETFs are very different. With anywhere from 16 to 3,636 holdings, many of these All Cap Blend ETFs have drastically different portfolios, creating drastically different investment implications.

The same is true for the ETFs in any other style, as each offers a very different mix of good and bad stocks. Large Cap Value ranks first for stock selection. Small Cap Growth ranks last. Details on the [Best & Worst ETFs in each style are here.](#)

How to Avoid Paralysis by Analysis

We think the large number of All Cap Blend (or any other) style ETFs hurts investors more than it helps because too many options can be paralyzing. It is simply not possible for the majority of investors to properly assess the quality of so many ETFs. Analyzing ETFs, done with the proper diligence¹, is far more difficult than analyzing stocks because it means analyzing all the stocks within each ETF. As stated above, that can be as many as 3,636 stocks, and sometimes even more, for one ETF.

Anyone focused on [fulfilling the fiduciary duty of care](#) recognizes that analyzing the holdings² of an ETF is critical to finding the best ETF. More reliable & [proprietary](#) fundamental data, proven in [The Journal of Financial Economics](#), drives our research and analysis of ETF holdings. Figure 1 shows our top-rated ETF for each style.

Figure 1: The Best ETF in Each Style

Ticker	Name	Investment Style	Assets (\$mm)
USMF	WisdomTree U.S. Multifactor Fund	All Cap Blend	\$148
SPGP	Invesco S&P 500 GARP ETF	All Cap Growth	\$360
VALQ	American Century STOXX U.S. Quality Value ETF	All Cap Value	\$208
ESGG	FlexShares STOXX Global ESG Impact Index Fund	Large Cap Blend	\$163
SPYG	State Street SPDR Portfolio S&P 500 Growth ETF	Large Cap Growth	\$9,676
QDF	FlexShares Quality Dividend Index Fund	Large Cap Value	\$1,497
ONEV	State Street SPDR Russell 1000 Low Volatility Focus ETF	Mid Cap Blend	\$512
BFOR	Barron's 400 ETF	Mid Cap Growth	\$135
QVAL	Alpha Architect U.S. Quantitative Value ETF	Mid Cap Value	\$182
XMLV	Invesco S&P MidCap Low Volatility ETF	Small Cap Blend	\$1,637
JSML	Janus Henderson Small Cap Growth Alpha ETF	Small Cap Growth	\$127
DES	WisdomTree U.S. Small Cap Dividend Fund	Small Cap Value	\$1,830

* Best ETFs exclude ETFs with TNAs less than \$100 million for inadequate liquidity

² Harvard Business School features the powerful impact of our research automation technology in the case [New Constructs: Disrupting Fundamental Analysis with Robo-Analysts](#).

Amongst the ETFs in Figure 1, [FlexShares Quality Dividend Index Fund](#) (QDF) ranks first overall, [Alpha Architect U.S. Quantitative Value ETF](#) (QVAL) ranks second, and [American Century STOXX U.S. Quality Value ETF](#) (VALQ) ranks third. State Street SPDR Portfolio S&P 500 Growth ETF (SPYG) ranks last.

How to Avoid “The Danger Within”

Why do you need to know the holdings of ETFs before you buy?

You need to be sure you do not buy an ETF that might blow up. Buying an ETF without analyzing its holdings is like buying a stock without analyzing its business and finances. No matter how cheap, if it holds bad stocks, the ETF's performance will be bad. Don't just take my word for it, see [what Barron's says](#) on this matter.

PERFORMANCE OF FUND'S HOLDINGS = PERFORMANCE OF FUND

Analyzing each holding within funds is no small task. Our [Robo-Analyst technology](#) enables us to perform this diligence with scale and provide the [research needed](#) to fulfill the fiduciary duty of care. More of the biggest names in the financial industry (see [At BlackRock, Machines Are Rising Over Managers to Pick Stocks](#)) are now embracing technology to leverage machines in the investment research process. Technology may be the only solution to the dual mandate for research: cut costs and fulfill the fiduciary duty of care. Investors, clients, advisors and analysts deserve the latest in technology to get the diligence required to make prudent investment decisions.

If Only Investors Could Find Funds Rated by Their Holdings

Our [ETF ratings](#) leverage our [stock coverage](#). We rate ETFs based on the aggregated ratings of the stocks each ETF holds.

FlexShares Quality Dividend Index Fund (QDF) is not only the top-rated Large Cap Value ETF, but is also the overall top-ranked style ETF out of the 573 style ETFs that we cover.

The worst ETF in Figure 1 is State Street SPDR Portfolio S&P 500 Growth ETF (SPYG), which still gets an Attractive rating.

It's Official: We Offer the Best Fundamental Data in the World

Many firms claim their research is superior, but none of them can prove it with independent studies from highly-respected institutions as we can. Three different papers from both the public and private sectors show:

1. Legacy fundamental datasets suffer from significant inaccuracies, omissions and biases.
2. Only our “novel database” enables investors to overcome these flaws and apply [reliable](#) fundamental data in their research.
3. Our proprietary measures of [Core Earnings](#) and [Earnings Distortion](#) materially improve stock picking and forecasting of profits.

Best Fundamental Data in the World

Forthcoming in [The Journal of Financial Economics](#), a top peer-reviewed journal, [Core Earnings: New Data & Evidence](#) proves our Robo-Analyst technology overcomes material shortcomings in legacy firms’ data collection processes to provide superior [fundamental data](#), [earnings](#) models, and [research](#). More [details](#).

Key quotes from the paper:

- “[New Constructs’] *Total Adjustments* differs significantly from the items identified and excluded from Compustat’s adjusted earnings measures. For example... 50% to 70% of the variation in *Total Adjustments* is not explained by *S&P Global’s (SPGI) Adjustments* individually.” – pp. 14, 1st para.
- “A final source of differences [between New Constructs’ and S&P Global’s data] is due to data collection oversights...we identified cases where Compustat did not collect information relating to firms’ income that is useful in assessing core earnings.” – pp. 16, 2nd para.

Superior Models

A top accounting firm features the superiority of our ROIC, NOPAT and Invested Capital research to Capital IQ & Bloomberg’s in [Getting ROIC Right](#). See the [Appendix](#) for direct comparison details.

Key quotes from the paper:

- “...an accurate calculation of ROIC requires more diligence than often occurs in some of the common, off-the-shelf ROIC calculations. Only by scouring the footnotes and the MD&A [as New Constructs does] can investors get an accurate calculation of ROIC.” – pp. 8, 5th para.
- “The majority of the difference...comes from New Constructs’ machine learning approach, which leverages technology to calculate ROIC by applying accounting adjustments that may be buried deeply in the footnotes across thousands of companies.” – pp. 4, 2nd para.

Superior Stock Ratings

Robo-Analysts’ stock ratings outperform those from human analysts as shown in this [paper](#) from Indiana’s Kelley School of Business. Bloomberg features the paper [here](#).

Key quotes from the paper:

- “the portfolios formed following the buy recommendations of Robo-Analysts earn abnormal returns that are statistically and economically significant.” – pp. 6, 3rd para.
- “Our results ultimately suggest that Robo-Analysts are a valuable, alternative information intermediary to traditional sell-side analysts.” – pp. 20, 3rd para.

Our mission is to provide the best fundamental analysis of public and private businesses in the world and make it affordable for all investors, not just Wall Street insiders.

We believe every investor deserves to know the whole truth about the profitability and valuation of any company they consider for investment. More details on our cutting-edge technology and how we use it are [here](#).

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first two days after New Constructs issues a report on that security.
