

Position Close Update: Didi Global (DIDI)

Didi Global (DIDI) – Closing Short Position – down 49% vs. S&P up 4%

We made Didi Global (DIDI: \$8/share) a Danger Zone pick on [June 21, 2021](#) and reiterated our opinion on [June 28, 2021](#). The firm’s IPO was on June 30, 2021. At the time of our report, DIDI earned an Unattractive [rating](#), and we explained why we thought the firm’s business model was broken and would never be profitable. We also warned about the regulatory risks of investing in Didi.

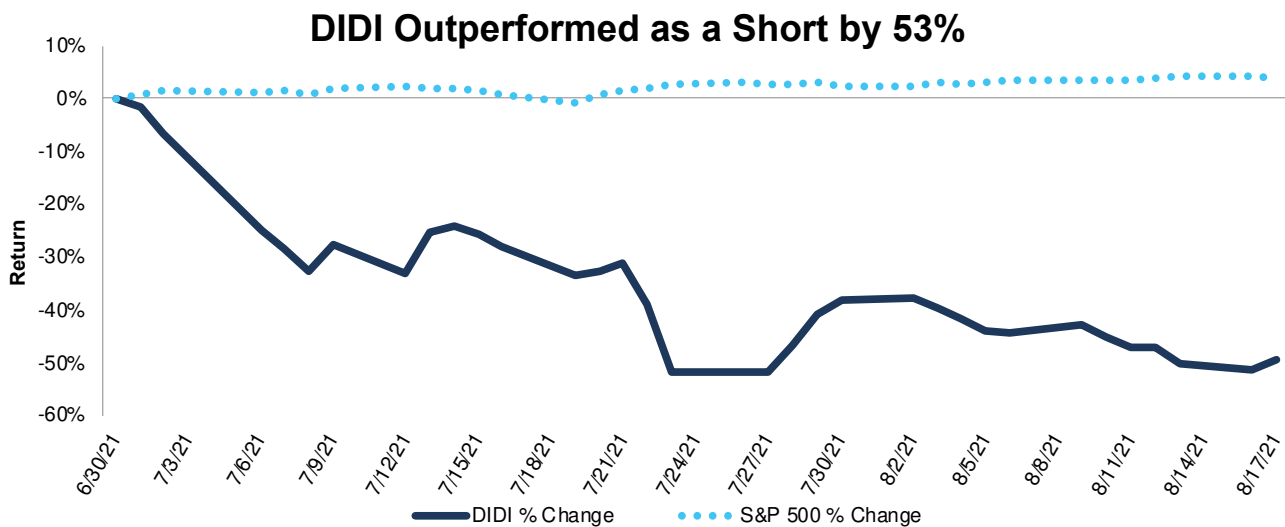

This report, along with all of our research¹, leverages our [more reliable fundamental data](#)² to get the truth about earnings, as shown in the Journal of Financial Economics paper, “[Core Earnings: New Data and Evidence](#).”

Learn more about the best fundamental research

During the 48-day holding period, DIDI outperformed as a short position by 53% (401% annualized), falling 49% from the opening price on IPO day compared to a 4% gain for the S&P 500. Didi raised \$4.4 billion from investors, and in the month-and-a-half since its IPO, has lost around \$29 billion in market cap.

Didi still earns our Unattractive rating and its business remains broken and unprofitable. Nevertheless, with such strong outperformance in such a short period of time, we’re taking gains and closing this short position.

Figure 1: DIDI vs. S&P 500 – Price Return – Successful Short Idea

Sources: New Constructs, LLC and company filings
 Note: Gain/Decline performance analysis excludes transaction costs and dividends.
 Return measured from opening prices on June 30, 2021, which is Didi Global’s IPO date.

² Three independent studies from respected institutions prove the superiority of our data, models, and ratings. Learn more [here](#).

It's Official: We Offer the Best Fundamental Data in the World

Many firms claim their research is superior, but none of them can prove it with independent studies from highly-respected institutions as we can. Three different papers from both the public and private sectors show:

1. Legacy fundamental datasets suffer from significant inaccuracies, omissions and biases.
2. Only our “novel database” enables investors to overcome these flaws and apply [reliable](#) fundamental data in their research.
3. Our proprietary measures of [Core Earnings](#) and [Earnings Distortion](#) materially improve stock picking and forecasting of profits.

Best Fundamental Data in the World

Forthcoming in [The Journal of Financial Economics](#), a top peer-reviewed journal, [Core Earnings: New Data & Evidence](#) proves our Robo-Analyst technology overcomes material shortcomings in legacy firms’ data collection processes to provide superior [fundamental data](#), [earnings](#) models, and [research](#). More [details](#).

Key quotes from the paper:

- “[New Constructs’] *Total Adjustments* differs significantly from the items identified and excluded from Compustat’s adjusted earnings measures. For example... 50% to 70% of the variation in *Total Adjustments* is not explained by *S&P Global’s (SPGI) Adjustments* individually.” – pp. 14, 1st para.
- “A final source of differences [between New Constructs’ and S&P Global’s data] is due to data collection oversights...we identified cases where Compustat did not collect information relating to firms’ income that is useful in assessing core earnings.” – pp. 16, 2nd para.

Superior Models

A top accounting firm features the superiority of our ROIC, NOPAT and Invested Capital research to Capital IQ & Bloomberg’s in [Getting ROIC Right](#). See the [Appendix](#) for direct comparison details.

Key quotes from the paper:

- “...an accurate calculation of ROIC requires more diligence than often occurs in some of the common, off-the-shelf ROIC calculations. Only by scouring the footnotes and the MD&A [as New Constructs does] can investors get an accurate calculation of ROIC.” – pp. 8, 5th para.
- “The majority of the difference...comes from New Constructs’ machine learning approach, which leverages technology to calculate ROIC by applying accounting adjustments that may be buried deeply in the footnotes across thousands of companies.” – pp. 4, 2nd para.

Superior Stock Ratings

Robo-Analysts’ stock ratings outperform those from human analysts as shown in this [paper](#) from Indiana’s Kelley School of Business. Bloomberg features the paper [here](#).

Key quotes from the paper:

- “the portfolios formed following the buy recommendations of Robo-Analysts earn abnormal returns that are statistically and economically significant.” – pp. 6, 3rd para.
- “Our results ultimately suggest that Robo-Analysts are a valuable, alternative information intermediary to traditional sell-side analysts.” – pp. 20, 3rd para.

Our mission is to provide the best fundamental analysis of public and private businesses in the world and make it affordable for all investors, not just Wall Street insiders.

We believe every investor deserves to know the whole truth about the profitability and valuation of any company they consider for investment. More details on our cutting-edge technology and how we use it are [here](#).

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first two days after New Constructs issues a report on that security.
