

Free Stock Pick from our Most Attractive Stocks Model Portfolio for August 2025

Earnings season is drawing to a close, but not without a bang. This period is among the most headline-driven in the market, with hype, momentum, and narratives often overshadowing the underlying data.

To help cut through the noise, we host weekly earnings watch parties to analyze what earnings and corporate results truly reveal about a company's fundamentals amid prevailing market trends. Watch the replay of this week's earnings watch party [here](#).

Additionally, in these earnings watch parties we provide insights into our [Stock Ratings](#), which generate real alpha, as proven by outperformance of the [Very Attractive Stocks Index](#) (ticker: [BNCVA1T:IND](#)).

To give you access to this alpha, we are sharing a free stock pick from our Most Attractive Stocks Model Portfolio. This Model Portfolio identifies the best stocks in the market, i.e. the stocks that are not only undervalued but also possess strong fundamentals.

This pick comes with a concise summary, not a full Long Idea report. The summary provides insight into the rigor of our research and approach to picking stocks. Whether you're a subscriber or not, we think it is important, especially in today's volatile market environment, that you're able to see our research on stocks. We're proud to share our work, and we want to help investors when they need it most.

Keep an eye out for the [free pick](#) from our Most Dangerous Stocks Model Portfolio, which will be published this week as well!

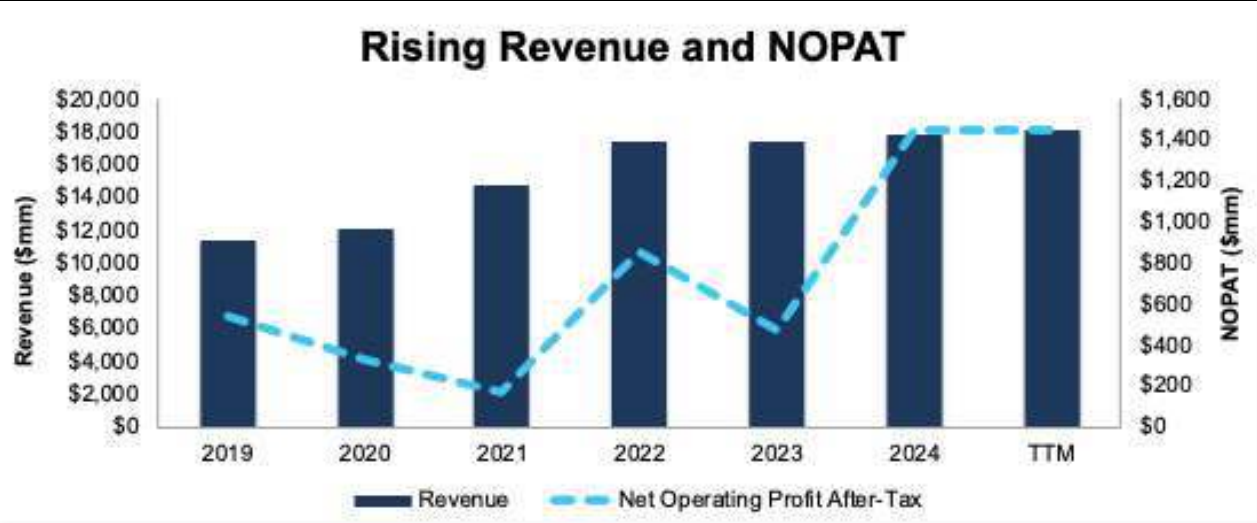

We hope you enjoy this research. Feel free to share with friends and colleagues!

We update this Model Portfolio monthly. The latest [Most Attractive](#) and [Most Dangerous](#) stocks Model Portfolios were updated and published for clients on August 6, 2025.

Free Most Attractive Stocks Pick: Pilgrim's Pride Corp (PPC)

Pilgrim's Pride (PPC: \$48/share) has grown revenue and net operating profit after tax ([NOPAT](#)) by 9% and 20% compounded annually since 2019, respectively. Pilgrim's Pride's NOPAT margin increased from 5% in 2019 to 8% in the trailing-twelve months (TTM), while its [invested capital turns](#) rose from 1.9 to 2.2 over the same time. Rising NOPAT margins and invested capital turns drive Pilgrim's Pride's return on invested capital ([ROIC](#)) from 9% in 2019 to 18% in the TTM.

Figure 1: Pilgrim's Pride's Revenue and NOPAT Since 2019

Sources: New Constructs, LLC and company filings

**PPC Is Undervalued**

At its current price of \$48/share, PPC has a price-to-economic book value ([PEBV](#)) ratio of 0.5. This ratio means the market expects Pilgrim's Pride's NOPAT to permanently decline by 50% from TTM levels. This expectation seems overly pessimistic for a company that has grown NOPAT by 20% compounded annually over the last five years and 6% compounded annually over the last ten years.

Even if Pilgrim's Pride's NOPAT margin falls to 5% (compared to 8% in the TTM) and the company grows revenue by 3% (below ten-year CAGR of 7%) compounded annually through 2034, the stock would be worth \$66/share today – a 38% upside. In this scenario, Pilgrim's Pride's NOPAT would fall 2% compounded annually through 2034. [Contact us for the math behind this reverse DCF scenario.](#)

Should Pilgrim's Pride grow profits more in line with historical levels, the stock has even more upside.

Critical Details Found in Financial Filings by Our [Robo-Analyst Technology](#)

Below are specifics on the adjustments we made based on Robo-Analyst findings in Pilgrim's Pride's 10-K and 10-Q:

Income Statement: we made over \$600 million in adjustments, with a net effect of removing over \$300 million in [non-operating expense](#). Professional members can see all adjustments made to the company's income statement on the GAAP Reconciliation tab on the Ratings page on our website.

Balance Sheet: we made over \$2 billion in adjustments to calculate invested capital with a net increase of just under \$200 million. One of the most notable adjustments was for [asset write downs](#). Professional members can see all adjustments made to the company's balance sheet on the GAAP Reconciliation tab on the Ratings page on our website.

Valuation: we made just over \$4 billion in adjustments to shareholder value, with a net decrease of around \$4 billion. Apart from [total debt](#), the most notable adjustment was for [deferred tax liabilities](#). Professional members can see all adjustments to the company's valuation on the GAAP Reconciliation tab on the Ratings page on our website.

This article was originally published on [August 15, 2025](#).

It's Official: We Deliver the Best Fundamental Data in the World

Many firms claim their research is superior, but none of them can prove it with independent studies from highly-respected institutions as we can. Three different papers from both the public and private sectors show:

1. The stock market is missing footnotes – and only we have that critical data.
2. Legacy fundamental datasets suffer from significant inaccuracies, omissions, and biases.
3. Our proprietary drives novel alpha. Our measures of [Core Earnings](#) and [Earnings Distortion](#) materially improve stock picking and forecasting of profits.

Best Fundamental Data in the World

In [The Journal of Financial Economics](#), a top peer-reviewed journal, [Core Earnings: New Data & Evidence](#) proves our Robo-Analyst technology overcomes material shortcomings in legacy firms' data collection processes to provide superior [fundamental data](#), [earnings](#) models, and [research](#). More [details](#).

Key quotes from the paper:

- “[New Constructs’] *Total Adjustments* differs significantly from the items identified and excluded from Compustat’s adjusted earnings measures. For example... 50% to 70% of the variation in *Total Adjustments* is not explained by S&P Global’s (SPGI) *Adjustments* individually.” – pp. 14, 1st para.
- “A final source of differences [between New Constructs’ and S&P Global’s data] is due to data collection oversights...we identified cases where Compustat did not collect information relating to firms’ income that is useful in assessing core earnings.” – pp. 16, 2nd para.

Superior Models

Ernst & Young features the superiority of our ROIC, NOPAT and Invested Capital research to Capital IQ & Bloomberg’s in [Getting ROIC Right](#). See the [Appendix](#) for direct comparison details.

Key quotes from the paper:

- “...an accurate calculation of ROIC requires more diligence than often occurs in some of the common, off-the-shelf ROIC calculations. Only by scouring the footnotes and the MD&A [as New Constructs does] can investors get an accurate calculation of ROIC.” – pp. 8, 5th para.
- “The majority of the difference...comes from New Constructs’ machine learning approach, which leverages technology to calculate ROIC by applying accounting adjustments that may be buried deeply in the footnotes across thousands of companies.” – pp. 4, 2nd para.

Superior Stock Ratings

Robo-Analysts’ stock ratings outperform those from human analysts as shown in this [paper](#) from Harvard Business School. Bloomberg features the paper [here](#).

Key quotes from the paper:

- “the portfolios formed following the buy recommendations of Robo-Analysts earn abnormal returns that are statistically and economically significant.” – pp. 6, 3rd para.
- “Our results ultimately suggest that Robo-Analysts are a valuable, alternative information intermediary to traditional sell-side analysts.” – pp. 20, 3rd para.

Our mission is to provide the best fundamental analysis of public and private businesses in the world and make it affordable for all investors, not just Wall Street insiders.

We believe every investor deserves to know the whole truth about the profitability and valuation of any company they consider for investment. More details on our cutting-edge technology and how we use it are [here](#).

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first two days after New Constructs issues a report on that security.
