

How to Avoid the Worst Style ETFs

Question: Why are there so many ETFs?

Answer: ETF issuance is profitable, so Wall Street keeps cranking out more products to sell.

[Learn more about the best fundamental research](#)

The large number of ETFs has little to do with serving your best interests as an investor. More [reliable](#) & [proprietary](#) fundamental data, proven in [The Journal of Financial Economics](#), drives our research and analysis of ETF holdings and provides investors with a [new source of alpha](#). We leverage this data to identify three red flags you can use to avoid the worst ETFs:

1. Inadequate Liquidity

This issue is the easiest to avoid, and our advice is simple. Avoid all ETFs with less than \$100 million in assets. Low levels of liquidity can lead to a discrepancy between the price of the ETF and the underlying value of the securities it holds. Small ETFs also generally have lower trading volume, which translates to higher trading costs via larger bid-ask spreads.

2. High Fees

ETFs should be cheap, but not all of them are. The first step is to benchmark what cheap means.

To ensure you are paying at or below average fees, invest only in ETFs with [total annual costs](#) below 0.51%, – the average total annual cost of the 968 U.S. equity Style ETFs we cover. The weighted average is lower at 0.15%, which highlights how investors tend to put their [money in ETFs with low fees](#).

Figure 1 shows John Hancock Fundamental All Cap Core ETF (JHAC) is the most expensive style ETF and JPMorgan BetaBuilders U.S. Equity ETF (BBUS) is the least expensive.

Figure 1: 5 Most and Least Expensive Style ETFs

Ticker	Name	Style	Total Annual Cost
Most Expensive			
JHAC	John Hancock Fundamental All Cap Core ETF	All Cap Blend	7.30%
ICAP	Infrastructure Capital Equity Income ETF	Large Cap Value	3.62%
FFND	One Global ETF	Large Cap Growth	3.32%
AWEG	Alger Weatherbie Enduring Growth ETF	Mid Cap Growth	3.08%
UGE	ProShares Ultra Consumer Staples	All Cap Blend	2.87%
Least Expensive			
BBUS	JPMorgan BetaBuilders U.S. Equity ETF	Large Cap Blend	0.02%
SPTM	State Street SPDR S&P 1500 Composite Stock Market	Large Cap Blend	0.03%
VOO	Vanguard S&P 500 ETF	Large Cap Blend	0.03%
USPX	Franklin U.S. Equity Index ETF	Large Cap Blend	0.03%
ILCB	iShares Morningstar U.S. Equity ETF	Large Cap Blend	0.03%

Sources: New Constructs, LLC and company filings

Investors need not pay high fees for quality holdings.¹ Invesco KBW Property & Casualty Insurance ETF (KBWP) is one of the best ranked style ETFs overall. KBWP's Attractive [Portfolio Management rating](#) and 0.39% total annual cost earns it a Very Attractive rating.²

On the other hand, iShares Morningstar Small Cap ETF (ISCB) holds poor stocks and earns our Unattractive rating, despite having low total annual costs of 0.04%. No matter how cheap an ETF looks, if it holds bad stocks, its performance will be bad. The quality of an ETF's holdings matters more than its management fee.

3. Poor Holdings

Avoiding poor holdings is by far the hardest part of avoiding bad ETFs, but it is also the most important because an ETF's performance is determined more by its holdings than its costs. Figure 2 shows the ETFs within each style with the worst [portfolio management ratings](#), a function of the fund's holdings.

Figure 2: Style ETFs with the Worst Holdings

Ticker	Name	Style	Portfolio Management Rating
UTSL	Direxion Daily Utilities Bull 3x Shares	All Cap Blend	Unattractive
UPGR	Xtrackers U.S. Green Infrastructure Select Equity ETF	Large Cap Blend	Unattractive
FTWO	Strive Natural Resources and Security ETF	Large Cap Growth	Unattractive
RDIV	Invesco S&P Ultra Dividend Revenue ETF	Large Cap Value	Unattractive
CSD	Invesco S&P Spin-Off ETF	Mid Cap Blend	Unattractive
ACES	ALPS Clean Energy ETF	Mid Cap Growth	Unattractive
RFV	Invesco S&P Mid Cap 400 Pure Value ETF	Mid Cap Value	Unattractive
HAPS	Harbor Human Capital Factor U.S. Small Cap ETF	Small Cap Blend	Unattractive
DWAS	Invesco Dorsey Wright Small Cap Momentum ETF	Small Cap Growth	Unattractive
VIOV	Vanguard S&P Small Cap 600 Value ETF	Small Cap Value	Unattractive

Sources: New Constructs, LLC and company filings

Invesco appears more often than any other providers in Figure 2, which means that they offer the most ETFs with the worst holdings.

ALPS Clean Energy ETF (ACES) is the worst rated ETF in Figure 2 based on our [predictive overall rating](#). Invesco S&P Spin-Off ETF (CSD), Xtrackers U.S. Green Infrastructure Select Equity ETF (UPGR), and Direxion Daily Utilities Bull 3x Shares (UTSL) also earn a Very Unattractive predictive overall rating, which means not only do they hold poor stocks, they charge high total annual costs.

Our [overall ratings on ETFs](#) are on our [stock ratings](#) of their holdings and the total annual costs of investing in the ETF.

The Danger Within

Buying an ETF without analyzing its holdings is like buying a stock without analyzing its business model and finances. Put another way, research on ETF holdings is necessary due diligence because an ETF's performance is only as good as its holdings. Don't just take our word for it, [see what Barron's says](#) on this matter.

PERFORMANCE OF ETFs HOLDINGS – FEES = PERFORMANCE OF ETF

It's Official: We Deliver the Best Fundamental Data in the World

Many firms claim their research is superior, but none of them can prove it with independent studies from highly-respected institutions as we can. Three different papers from both the public and private sectors show:

1. The stock market is missing footnotes – and only we have that critical data.
2. Legacy fundamental datasets suffer from significant inaccuracies, omissions, and biases.
3. Our proprietary drives novel alpha. Our measures of [Core Earnings](#) and [Earnings Distortion](#) materially improve stock picking and forecasting of profits.

Best Fundamental Data in the World

In [The Journal of Financial Economics](#), a top peer-reviewed journal, [Core Earnings: New Data & Evidence](#) proves our Robo-Analyst technology overcomes material shortcomings in legacy firms' data collection processes to provide superior [fundamental data](#), [earnings](#) models, and [research](#). More [details](#).

Key quotes from the paper:

- “[New Constructs’] *Total Adjustments* differs significantly from the items identified and excluded from Compustat’s adjusted earnings measures. For example... 50% to 70% of the variation in *Total Adjustments* is not explained by S&P Global’s (*SPGI*) *Adjustments* individually.” – pp. 14, 1st para.
- “A final source of differences [between New Constructs’ and S&P Global’s data] is due to data collection oversights...we identified cases where Compustat did not collect information relating to firms’ income that is useful in assessing core earnings.” – pp. 16, 2nd para.

Superior Models

Ernst & Young features the superiority of our ROIC, NOPAT and Invested Capital research to Capital IQ & Bloomberg’s in [Getting ROIC Right](#). See the [Appendix](#) for direct comparison details.

Key quotes from the paper:

- “...an accurate calculation of ROIC requires more diligence than often occurs in some of the common, off-the-shelf ROIC calculations. Only by scouring the footnotes and the MD&A [as New Constructs does] can investors get an accurate calculation of ROIC.” – pp. 8, 5th para.
- “The majority of the difference...comes from New Constructs’ machine learning approach, which leverages technology to calculate ROIC by applying accounting adjustments that may be buried deeply in the footnotes across thousands of companies.” – pp. 4, 2nd para.

Superior Stock Ratings

Robo-Analysts’ stock ratings outperform those from human analysts as shown in this [paper](#) from Harvard Business School. Bloomberg features the paper [here](#).

Key quotes from the paper:

- “the portfolios formed following the buy recommendations of Robo-Analysts earn abnormal returns that are statistically and economically significant.” – pp. 6, 3rd para.
- “Our results ultimately suggest that Robo-Analysts are a valuable, alternative information intermediary to traditional sell-side analysts.” – pp. 20, 3rd para.

Our mission is to provide the best fundamental analysis of public and private businesses in the world and make it affordable for all investors, not just Wall Street insiders.

We believe every investor deserves to know the whole truth about the profitability and valuation of any company they consider for investment. More details on our cutting-edge technology and how we use it are [here](#).

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first two days after New Constructs issues a report on that security.
